

**MacMillan Reports 0.54% Copper Equivalence Over Entire 371 Metres of First Ever Diamond Drill Hole in Aguila East Target**

**Toronto, Canada, October 4, 2007** – George A. Brown, President & CEO of MacMillan Gold Corp. (TSX-V: MMG), and David A. Bending, P.Geo., Vice President and a Qualified Person, are pleased to report the results from Hole 4 of the 2007 Phase 1 diamond drilling program at the Aguila Cu-Mo Project, Ancash, Peru. Duran Ventures Inc. (TSX-V: DRV) is earning a 50% interest in the 1,100 hectare Aguila Project from MacMillan Gold Corp.

Three holes in the Aguila Cu-Mo Target and two holes in the Aguila East Cu-Mo Target have been completed to date. Holes 1 to 3 were drilled to the southwest within the mineralized Aguila porphyry body as part of a systematic northeast-southwest section across both the Aguila and untested Aguila East Cu-Mo Targets. Deepening of these holes is planned as part of the Phase 2 drilling program pending an evaluation of all the assays. The results of Holes 1 and 2 are summarized in MacMillan's September 10, 2007 News Release and the results of Hole 3 are in MacMillan's September 12, 2007 News Release.

Drill Holes 4 and 5 were drilled to northeast to evaluate the potential for economic mineralization within the untested Aguila East target. The Company is pleased to report that Hole 4 encountered mineralization throughout the entire length of the hole which terminated in mineralized porphyry short of target depth due to drilling equipment limitations. The entire length of Hole 4 averaged 0.343% Cu and 0.020% Mo over 371 metres which converts to 0.54% Total Copper Equivalence\*.

The mineralization which has now been identified from Holes 1 through 4 to span a potential horizontal width below surface in excess of 500 metres and to depths in excess of 400 metres.

**Hole 4 Weighted Averages**

Rock Type	FROM (m)	TO (m)	WIDTH (m)	Cu ppm	Cu %	Mo ppm	Mo %	Total Cu Equiv. %*
Porphyry	0.0	9.0	9.0	8,275	0.828	405	0.041	1.233
Quartzite	9.0	78.0	69.0	1,691	0.169	418	0.042	0.587
Quartzite	78.0	191.5	113.5	1,917	0.192	199	0.020	0.391

Porphyry	260.0	308.0	48.0	7,072	0.707	81	0.008	0.788
Porphyry	308.0	371.0	63.0	3,371	0.337	71	0.007	0.408
<b>TOTAL</b>	<b>0.0</b>	<b>371.0</b>	<b>371.00</b>	<b>3,435</b>	<b>0.343</b>	<b>198</b>	<b>0.020</b>	<b>0.543</b>

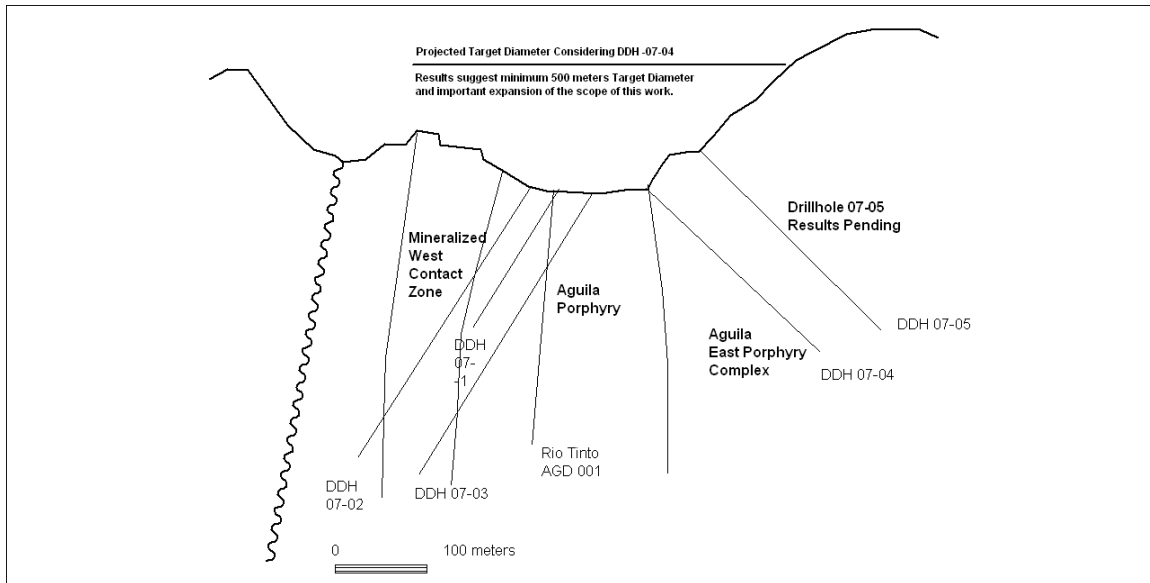

**Summary of Holes 1 through 5**

Hole #	UTM East	UTM North	Elevation m ASL	Azimuth	Dip	Depth	Cu %	Mo %	Total Cu Equiv. %*
1	205583	9050463	3939	225	-60	250	0.650	0.023	0.880
2	205540	9050445	3942	250	-60	530	0.338	0.023	0.568
3	205633	9050481	3944	250	-60	510	0.525	0.043	0.955
4	205700	9050517	3940	70	-45	371	0.343	0.020	0.543
5	205752	9050520	3993	70	-45	401	<b>Not Yet</b>	<b>Reported</b>	

\* **Note:** Total Cu Equivalence % is the sum of the Cu % plus 10 times the Mo % based on an assumed 10:1 economic ratio of Mo to Cu selling prices (i.e. US\$1.50 Cu to US\$15. Mo or US\$2.50 Cu to US\$25. Mo or US\$3.50 Cu to US\$35. Mo.). Metallurgical recoveries and net smelter returns are assumed to be 100%. These Equivalence grades should not be interpreted as actual grades since the conversion ratio varies with the volatile prices of copper and moly and the economic recovery of copper and moly can vary significantly in actual extraction and processing.

The Company is extremely pleased with these results as they provide evidence that the Aguila target has the potential to become economically significant. The Pasacancha Ag/Au and base metal target discovered last year is located two km to the east of Aguila on the Company's adjoining property. A Phase 2 drilling program has been initiated to drill test the Pasacancha target and also to continue to expand the Aguila and Aguila East. A diamond drill has been sourced and a contract has been signed with Iguana Drilling SAC of Lima, Peru with drilling planned to commence later this month as soon as a new B permit is received from the granting authorities.

The exploration work as reported has been planned and is being supervised by Mr. Bending, P.Geo.. All samples are delivered to the Lima laboratory of Inspectorate Services Peru SAC (a certified lab) for preparation and multi-element ICP analysis followed by AQR/AA assaying for Cu and Mo. The company has a QA/QC protocol in place including the use of duplicate sampling by outside labs, certified standards and blanks and secure care and custody of samples.
